## Philips DVP3254K\_55

Also for model DVP3254K\_75.

**My mod firmware have to base second release from Philips (with USB fix), from September 2008.**  
**Fix DivX file USB playback crash issues seen during end of playback.**

There are two version of this player 3254K with Sony DVD and 3254KI with Samsung DVD unit.

*Open tray and press "55" to see what player do you have. You will see on screen DVD3254K\_55.bin or DVP3254KI\_.bin. Choose correct version (I or not).*

- New skins
- New filebrowser with scrollbars, outline font (**48 char from USB**, and from CD/DVD limit to "yellow band" - intelligent file cutter, max. 64 char.)
- **8 lines in filebrowser**. No arrows, use file index 00x/abc for position in folder.
- Jpeg preview in background.
- New icons for files.
- 4 fonts for subtitles. (small, standard, medium and large)
- Menu for font color. (\*\*\*)
- Menu for "Load Original Subtitles, if not find load all" with 3 option "Load Original then all", "Load All" and "Load match name". (\*\*\*\*)
- Menu for set vertical position for subtitles.
- All menu for avi subtitles are in "General Page". You can change fonts, color and position (vertical) when movie play
- Autoload subtitles
- For avi files "GoTo: h:mm:ss". When play avi files press "Title" 2 times and enter H:MM:SS to jump to moment you want.
- WordWrap and reformat, better but not perfect...
- OSD font with outline, better contrast for all OSD message.

- Full UnicodeToCp (USB and ISO+Joliet), show all special characters in file browser.
- Partial remove UOP ([User operation prohibition](#))
- If you want to use "ssa", "smi" or vobsub (sub/idx) subtitle use version without patch "Load ORG Then All", version is **NO\_ORG**.
- For model 3254KI two version:
  - **Without color** for subtitles - 2 version (only white (or yellow) subtitles with black outline).
  - **With colors** for subtitle (text, outline and background), but with bug: *"When exit setup while watch a movie, color for subtitles is changed"*.

Instruction for upgrading [HERE](#)

### Knows bugs

On some custom DVD's, from time to time subtitles are "dirty".

[DVP3254KI\\_55\\_vb6\\_v5\\_1\\_NO\\_ORG\\_Y.rar](#)

# New design

- New skin for logo and filebrowser (smaller height for filebrowser).
- New font for OSD and filebrowser
- New icons
- Yellow bar is now grey
- For 3254K 1 tag mp3
- Only version with "Load Org then all".
- Volume stored and restored on power off/on
- FIX Color Bug for version "I"

**Renato** say:

I had the DVP3254K for years, but never tried to upgrade it. Ok, I just did it, and looks amazing! Just tried some features like the GoTo functions and worked like a charm. Great job and thanks for share it!

Oussama Afellad (Author) April 2, 2012 at 2:46 pm There is no difference, I just upoeadld the show on 2 different websites so that you will be able to download 2 parts in the same time, and if somebody has any problems with the first links he can download from the second ones.
